

ATISHAY JAIN

SOFTWARE ENGINEERING INTERN | AI SYSTEMS & PRODUCT ENGINEERING

Ludhiana, Punjab, India | +91 9646009828 | ajain8_be23@thapar.edu

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Computer Engineering student building production-oriented software, AI systems, and real product workflows. Strong in C++, Python, full-stack development, system design, and core computer science fundamentals.

SKILLS

Languages: C++, Python, TypeScript, JavaScript, SQL

Frontend: React, Next.js, component-based UI, responsive design, state management

Backend / APIs: FastAPI, Node.js, REST API design, WebSockets, authentication, authorization

Data: PostgreSQL, SQLite, SQLAlchemy, schema design, relational data modeling

AI / ML: PyTorch, ONNX inference, transformer models, local LLM inference, reinforcement learning, LoRA fine-tuning

Systems / DevOps: Docker, Git, GitHub Actions, CI/CD, real-time systems, OCR pipelines

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, system design

EDUCATION

Thapar Institute of Engineering and Technology

Aug 2023 - Jun 2027

B.E. Computer Engineering

CGPA: 8.00

Sacred Heart Senior Secondary School

Class XII, Science: 94.2%

SELECTED PROJECTS

ReceiptSplit - UPI-Native Receipt Splitting Platform | *Next.js, FastAPI, PostgreSQL, OCR*

- Built receipt intake, room joining, collaborative item claiming, exact split calculation, and direct UPI payment coordination; designed modular OCR and deterministic integer-paise settlement flows.

The Loop - Campus Event Platform | *React, FastAPI, WebSockets, Maps*

- Collaborated on a PWA spanning event discovery, RSVP, chat, friends, carpool, admin workflows, venue navigation, JWT auth, and personalized recommendations.

Hybrid GenAI Transaction Categorizer | *React, FastAPI, ONNX Runtime, SQLite*

- Built a privacy-first offline classifier with local NLP inference, merchant memory, confidence routing, review overrides, history, and explainable transaction insights.

Project Mahoraga - Adaptive RL Environment | *Python, Gymnasium, PyTorch, LoRA*

- Designed a stateful boss-fight environment with adaptive resistances, cooldowns, reward shaping, curriculum pressure, and explicit anti-reward-hacking constraints.

EXPERIENCE

Finance and Documentation Manager, TEDxTIET

Aug 2025 - Feb 2026

- Managed an INR 3.5 lakh event budget for a 350-attendee conference and built structured Excel workflows for allocation, approvals, sponsor records, expense tracking, and variance reporting.

CERTIFICATIONS

CI/CD Pipeline with Docker - Coursera (2026) | Introduction to Software Engineering - IBM (2026) | Introduction to RAG - Duke University (2026) | Fundamentals of Deep Learning - NVIDIA/Whizlabs (2026)
